

## Immediate Release (FINAL)

### **Informatics launches an Online Instant Response Admission System (OIRAS) which will be able to evaluate student's qualifications and present the choice of programmes and exemptions for entry.**

**12 February 2007, Singapore** – Students are often unsure if they are eligible for entry and/or the kind of exemptions available when they apply to study in an institution. The evaluation process typically takes time, varying from institution to institution which also depends on the information and documents provided. Leading private education service provider, Informatics Education launches an Online Instant Response Admission System (OIRAS) which can evaluate student's qualifications and present to them the choice of further education options with Informatics. With their highest qualifications, they will also be able to know instantly, the exempted modules in their choice programme.

Designed to improve service standard for its global students, this admission system will be first-of-its kind. Easily navigated, students only need to select the Institution and country in which they obtain their highest qualifications. It will then present to students the programmes available for their choice. Upon their choice of advancement, the student will be able to receive instantly credit transfers or exempted modules into the choice programme. After putting in their particulars, students can then print a conditional letter of offer and bring to any nearest Informatics centre to process their enrolment.

“This new service goes beyond aesthetical change. We are re-engineering the private education business in view of the intense global competition. This is only one of the many innovative changes the new leadership in Informatics is making. We promise a student-centric approach that will drive all our initiatives.” Mr Val Ortega, Chief Executive Officer shared.

“This Online Instant Response Admission System (OIRAS) will be accessible to all potential students within our global network of 131 centres and other countries where students are planning to study abroad. With this Online Instant Response Admission System (OIRAS), the admission evaluation process will be more efficient and effective as students will receive real-time response by just clicking of buttons.” added Mr Val Ortega.

With this Online Instant Response Admission System (OIRAS), students no longer have to wait in anxiety if they will be accepted into their choice programme or if they are able to obtain any module exemptions with their qualifications. Log onto [www.informaticseducation.com](http://www.informaticseducation.com) and experience it! You'll be delighted how user friendly it will be.
