

NEWS RELEASE

Informatics Leads the Way with the Launch of Mobile Applications Technology!

23 November 2006, Singapore – One of the most powerful and rapidly expanding technologies today is that of wireless communication devices. In the last decade the use of computing technology in mobile devices such as hand phones, PDAs, pagers, and domestic appliances has exploded. Moreover technological advances in cellular communications, wireless Local Area Network (LAN) and satellite services have all led to the emergence of mobile and wireless computing environments. Tapping on this, Informatics, global leader in providing quality lifelong learning services, is launching its Mobile Application Technology [MAT] programmes. This new, vibrant and exciting programme is designed to produce IT professionals with the knowledge of mobile and wireless technologies to support the demands of the Infocomm industries and is expected to launch in January 2007.

Graduates will be equipped with the knowledge of mobile application development and wireless system infrastructure to provide feasible mobile solutions. With the demand for IT professionals with mobile and wireless computing on the rise, this is one programme that translates into money making career opportunities for IT enthusiasts.

The programme builds on a solid foundation of generic software development skills, networking, computing fundamentals and information systems. Through its hands-on approach, students will acquire the skills needed for designing, developing, and deploying mobile applications that can be run on mobile devices as well as the ability to apply concepts and technologies to practical solutions. Among the core course contents are Java Programming, Wireless and Communication Technology, and Advanced Mathematics for Communication Systems.

At the end of the 2 years programme, students will graduate with an International Advanced Diploma in Mobile Applications Technology. Those who wish to further enhance their career opportunities can then continue with a final year bachelor's degree programme with one of our renowned university partners.

Areas of career opportunities that await graduates include the development of mobile applications, modern network management, Internet security, corporate communications, and media support.

About Informatics Education Ltd

Informatics Education Ltd, listed on the mainboard of the Stock Exchange of Singapore, was established in 1983, and is a multinational corporation providing lifelong learning services in information technology and business management. Informatics presently has a global network spanning in Asia, Middle East, Africa, and other region, offering programmes from foundation programme (for international students) to undergraduate and postgraduate degree completions. The Company has won many awards including the Singapore Brand Awards 2002 and 2003, the Singapore Quality Class for Private Education Organisations (SQC for PEO) as well as the People Developer Standards Award.
